Docket Nos: 50-329 OM, OL
and 50-330 OM, OL

Ms. Billie Pirner Garde
Citizens Clinic Director
Government Accountability Project
Institute for Policy Studies
1901 Que Street, N.W.
Washington, D. C. 20009

Dear Ms. Garde:

Your letter of March 25, 1983, to Mr. Darl Hood has been referred to me for reply.

As you know, the meeting requested by TERA Corporation in their March 18, 1983, letter (docketed by Mr. Hood on March 21, 1983) with respect to the independent design and construction verification (IDCV) program for Midland Plant, Units 1 and 2 was held on April 13, 1983. The meeting discussed the Auxiliary Feedwater System with respect to the present TERA Engineering Program Plan, and also the current plans for incorporating the two additional systems (onsite emergency AC power, and HVAC for the Control Room) selected by the NRC on March 22, 1983. I understand you will soon be submitting your comments in response to the April 13, 1983, discussions.

Your letter asks when TERA's confirmed items should be reported to NRC. Staff comments on reporting requirements as proposed by TERA at the April 13, 1983, meeting will be provided in the near future. We also inferred from your letter a concern that confirmed items may have been reported to Consumers Power Company and not to the NRC. In a telephone discussion on April 7, 1983, (summary enclosed) we were advised by TERA that this is not the case.

We trust the meeting and this letter have been responsive to your concerns.

Sincerely,

(Signed) T. A. Rehm

Dear Ms. Garde:

Your letter of March 25, 1983 to Mr. Darl Hood has been referred to me for reply.

The meeting requested by TERA Corporation in their March 18, 1983 letter (docketed by Mr. Hood on March 21, 1983) with respect to the independent design and construction verification (IDCV) program for Midland Plant, Units 1 and 2 has been scheduled for April 13, 1983. The meeting notice with further details, which you were sent, is enclosed for convenience (Enclosure 1). Mr. Hood indicates that you were also informed of the meeting by telephone call on April 7, 1983. The meeting will discuss the Auxiliary Feedwater System with respect to the present TERA Engineering Program Plan, and also the current plans for incorporating the two additional systems (Onsite emergency AC power, and HVAC for the Control Room) selected by the NRC on March 22, 1983.

Your letter asks when TERA's confirmed items should be reported to NRC. Staff comments on reporting requirements as proposed in Section 5 of the TERA IDCV Engineering Program Plan, forwarded to you March 21, 1983, will be provided at the April 13, 1983 meeting. We also inferred from your letter a concern that confirmed items may have been reported to Consumers Power Company and not to the NRC. In a telephone discussion on April 7, 1983, (Enclosure 2) we were advised by TERA that this is not the case.

We trust this letter is responsive to your concerns.

Sincerely,

Thomas Rehm, Assistant for Operations
 Office of the Executive Director
 for Operations

APR 8 1983

Docket Nos. 50-329, OM, OL
50-330 OM, OL

APPLICANT: Consumers Power Company
FACILITY: Midland Plant, Units 1 and 2
SUBJECT: RECORD OF TELEPHONE DISCUSSION REGARDING PROPOSED
APRIL 13, 1983 MEETING AND OPEN ITEMS REPORTING

On April 7, 1983, I called H. Levin, TERA Corporation, regarding the independent design and construction verification (IDCV) program for Midland Plant, Units 1 and 2. The purpose was to establish the agenda for the forthcoming meeting on April 13, 1983. TERA will describe the present status of their planning for the IDCV Program with respect to the second (On-site emergency power) and third (HVAC for Control Room) systems. The first IDCV system (Auxiliary Feedwater) will be reviewed briefly, followed by questions and comments.

I related to Mr. Levin the third paragraph from the enclosed letter of March 25, 1983 from Ms. B. Garde. I asked if any reporting of open, confirmed or resolved (OCR) items has been given to Consumers Power Company and not to NRC, as implied by Ms. Garde. Mr. Levin replied that no OCR item reporting has occurred to date to either party, and that TERA is operating in accordance with the Protocol enclosed with J. Keppler's 3/28/83 letter to Consumers Power Company, the external service list from Ms. Adensam's letter of March 24, 1983, and Section 5.0 of the TERA IDCV Engineering Program Plan. Mr. Levin would like to discuss reporting further at the April 13, 1983 meeting.

March 25, 1983

Mr. Darl Hood
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Hood:

I am in receipt of your March 21, 1983 letter SUBJECT: TERA CORPORATION'S PROJECT QUALITY ASSURANCE AND ENGINEERING PROGRAM PLANS FOR THE MIDLAND INDEPENDENT DESIGN AND CONSTRUCTION VERIFICATION PROGRAM. The attached March 18, 1983 TERA letter includes a request for a public meeting between TERA and the NRC staff.

I also understand, through Mr. Darrell Eisenhut's March 23, 1983 letter that TERA has been requested to expand the two initially required systems to include an independent design verification (IDV) of that part of the Heating, Ventilating, and Air Conditioning (HVAC) equipment that directly affects the control room. This decision is extremely significant, and I am anxious to review any detailed methodology plans by either the TERA Corporation or the NRC which will determine the adequacy of the HVAC system.

Finally, I note that the TERA letter of March 18, 1983 indicates that "...the Midland IDVC program has progressed to the point where confirmed items have been identified." It appears that the confirmed items have not been reported to the NRC at this time, and that TERA is asking for guidance about when to report these confirmed items. We are deeply distressed that the confirmed items have not been identified as of yet to the NRC. It was our understanding that all communication would be given simultaneously to the NRC and Consumers Power Company, yet obviously that has not occurred. In our March 7, 1983 letter to Mr. Darrell Eisenhut we pointed out that there had been an admission that TERA had provided Consumers with a report that the NRC had not yet received, (Public Meeting, Midland, Michigan, February 8, 1983). Now TERA has "confirmed items" which it has not reported to the NRC. Please clarify for TERA, as well as for us, the details of the requirement that information be provided to the NRC and to Consumers at the same time.

Your response will be appreciated in the near future.

Sincerely,

Billie Firner Garde
