

NOTICE OF VIOLATION

International Research
and Development Corporation
Mattawan, MI

License No. 21-11315-02
Docket No. 030-08546

During an NRC inspection conducted on May 24, 1994, violations of NRC requirements were identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions," 10 CFR Part 2, Appendix C, the violations are listed below:

1. Condition 24.B. of License No. 21-11315-02 requires that licensed material be possessed and used in accordance with statements, representations and procedures contained in a letter dated August 11, 1993.

- A. Item 3 of the August 11, 1993, letter requires that the radiation safety officer (RSO) perform independent area surveys at three month intervals.

Contrary to the above, as of May 24, 1994, the RSO failed to perform independent area surveys.

This is a Severity Level IV violation (Supplement VI).

- B. Item 5, page 9 of the August 11, 1993, letter requires that contamination surveys of individual packages in storage (drums) and the storage area in general be conducted monthly.

Contrary to the above, as of May 24, 1994, contamination surveys of individual packages (drums) in storage and the storage area in general have not been conducted.

This is a Severity Level IV violation (Supplement VI).

2. 10 CFR 30.35(g) requires each person licensed under this part or parts 32 through 35 of this chapter to keep records of information important to the safe and effective decommissioning of the facility in an identified location and including a list contained in a single document of the information specified.

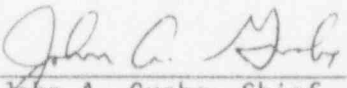

Contrary to the above, the licensee failed to keep records of information important to the safe and effective decommissioning of the facility in an identified location including a list containing the information specified.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, International Research and Development Corporation is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, Region III, 801 Warrenville Road, Lisle, Illinois, 60532-4351, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a demand for information may be issued as to why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
