

OFFICE OF THE SECRETARY

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555

June 10, 1982

ESDZP  
To: Minoque, RES  
DeYoung, IE  
Denton, NRR  
FAM: Dewayne Morris  
EDO

MEMORANDUM FOR: William J. Dircks, Executive Director  
for Operations  
FROM: Samuel J. Chilk, Secretary  
SUBJECT: SECY-82-207 - FINAL RULE, "ENVIRONMENTAL  
QUALIFICATION OF SAFETY-RELATED ELECTRIC  
EQUIPMENT FOR NUCLEAR POWER PLANTS"

The Commission has asked that it be provided with a draft immediately effective rule that would extend the present deadline of June 30, 1982 for qualification of electric equipment. The draft should offer the Commission a choice between two alternatives: (a) an extension for a specific period of time, i.e., 90 days; and (b) an extension consistent with the deadlines in SECY-82-207, i.e., the second refueling beyond March 31, 1982 with provisions for extensions to November 30, 1985.

The rule should also state that all of the other requirements and provisions of CLI-80-21 remain in effect, that present programs of equipment qualification should continue, and that the Commission intends to issue a final rule on equipment qualification requirements in the near future. Justification of the extension, based upon the adequacy of the submittals to the NRC and the staff's determination that the utilities have justified continued operation, should be included.

(EDQ) (SECY SUSPENSE: 6/18/82)
