18 July, 1979

Dr. John T. Collins
U.S. Nuclear Regulatory Commission
Washington, DC 20555

Dear John:

This is to extend a warm invitation to you to become an editor of Nuclear and Chemical Waste. Your responsibility as an editor would consist of soliciting papers, reviewing manuscripts, and evaluating reviewed manuscripts as to their suitability for publication.

The Journal will appear quarterly starting from January of 1980. We anticipate a bimonthly or monthly publication in 1981. All editorial appointments are made for a period of two years and can be extended upon mutual agreement.

We have been fortunate to have the collaboration of a large number of highly qualified individuals and I am looking forward to hearing your positive reply.

Sincerely,

A. Alan Moghissi, PhD
