Dear John:

This is a short note to thank you for your participation in the "iodine filtering" section of the IAEA technical report we are preparing. I greatly appreciated your involvement since some members of the sub committee apparently did not have time to contribute. Perhaps you'll think twice about sitting in as an "observer" in the future!

The TMI information you presented was extremely interesting in view of our work on iodine behavior and hydrogen combustion. I am wondering if we could continue this interaction - perhaps by receiving your reports or by participating in meetings. I feel that TMI information would be most useful for guiding our laboratory work.

I enjoy talking with you and thanks again for your help.

Sincerely,

D.F. Torgerson, Head
Research Chemistry Branch

Dear Mr. Torgerson:

Thank you for your letter of July 5, 1979 concerning the IAEA Technical Report on the Retention of Gaseous Radionuclides from Nuclear Power Plants under Normal and Accident Conditions.

This is to advise you that I would be very pleased to act as an "observer" for the iodine filtering section of the report. If I can be of any assistance please don't hesitate to contact me.

Sincerely,

A handwritten signature in cursive script that reads "John T. Collins".
