Docket No. 50-254
Docket No. 50-265

Commonwealth Edison Company
ATTN: Mr. Cordell Reed
Vice President
Post Office Box 767
Chicago, IL 60690

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. L. J. Hueter and W. B. Grant of this office on August 30 through September 2, 1982, of activities at Quad-Cities Nuclear Power Station, Units 1 and 2, authorized by NRC Operating Licenses No. DPR-29 and No. DPR-30 and to the discussion of our findings with Mr. N. Kalivianakis and other members of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel. The inspection included a review of findings from inspections conducted on June 22 and August 2, 1982, by representatives of the Department of Social and Health Services, State of Washington, of waste shipments from the Quad-Cities Nuclear Power Station, upon arrival of the shipments at the Richland, Washington low-level waste burial site. The results of the State's inspections and their enforcement actions were conveyed to your company by letters dated June 25 and August 26, 1982, from the State of Washington.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as described in the enclosed Appendix. The inspection showed that the actions described in Section 9 of the attached report had been taken to correct the identified noncompliance and to prevent recurrence. Consequently, no reply to this noncompliance is required and we have no further questions regarding this matter at this time. If our description of your corrective actions is incorrect, please notify this office in writing. The appropriate Severity Level for the non-compliance is being evaluated by our Office of Inspection and Enforcement and will be provided to you at a later date.
