Dear Mr. Del Core:

I have received your letter dated May 19, 1989, regarding employee concerns at the Millstone facility and your request that I look into this matter. I have forwarded your letter to NRC's Office of Nuclear Reactor Regulation, which has responsibility for the initial agency review of allegations of this type. A member of the NRR staff will be in contact with you in the near future. I have also requested the NRC's Executive Director for Operations to monitor the agency's review of your concerns.

Sincerely,
