MAR - 5 1990

B & B X-Ray and Inspection
2015 Westwind Drive, No. 10
Bakersfield, California 93301

Attention: Mr. Issac Bertrand
President

Gentlemen:

SUBJECT: NRC INSPECTION

This letter refers to the routine safety inspection conducted by Mr. David D. Skov, of this office, during February 2 through 12, 1990, of activities authorized by NRC under the general license as provided in 10 CFR 150.20. The initial findings of this inspection were discussed with Mr. S. Bechtel during the exit briefing at your office on February 9, 1990, and also with you following the inspection on February 10 and 21, 1990.

The inspection was an examination of the activities conducted under the general license at Vandenberg Air Force Base, California, as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of your California specific license. The inspection consisted of selective examinations of procedures and records, interviews with personnel, and observations by the inspector.

During this inspection, certain of your activities were found to be in apparent violation of NRC requirements. The number and type of violations indicate a lack of management control in some areas of your radiation safety program. Due to our concern for these apparent violations, you should prepare a response to the items discussed in the enclosed inspection report for presentation at a management conference to be scheduled by us at a later date.

The need for and nature of the enforcement actions relative to the apparent violations, as discussed in the enclosed inspection report, will be considered after the management conference and will be the subject of separate correspondence.
