SUBJECT: Comments on Proposed Rule 10 CFR Part 2 as published in the  
Federal Register on October 25, 1982

Gentlemen:

I am writing to strongly support the proposed rule which deals with the  
immediate effectiveness element for power reactor construction permits.

The proposed rule would delete the redundant review by the Appeals Board  
of the licensing boards decision. In the Post-TMI climate it was decided  
that the Nuclear Regulatory Commission, itself, should conduct this review.  
Subsequent to that, both the Appeals Board and the Commission are reviewing  
the merits of licensing board decisions. This is time consuming and does  
not represent an appropriate use of our review resources and as the  
Commission is the ultimate supervisory authority and wishes to continue  
doing these types of reviews, it is my feeling that the appeals board review  
should be deleted.

I support this rule change.

Sincerely,

*John D. Parkyn*  
John D. Parkyn
