NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

July 18, 1979

Mr. W. B. Stewart
Supervising Design Engineer
Nuclear Materials Management Department
Ontario Hydro
700 University Avenue
Toronto, Ontario M5G 1X6

Dear Bryon:

This is in response to your letter of June 25, 1979 in which you requested a copy of the preliminary evaluation of the TMI-2 event. Unfortunately the report has not yet been released for public review. When it is I will make sure you are included on the distribution.

As requested, I am enclosing a copy of the iodine removal paper that I presented in Moscow last month. Please recognize that this is a preliminary report and that we are still working on the final evaluation. When this has been completed I will see that a copy is sent to your attention.

You indicated in your letter that you (Ontario Hydro) would like to visit TMI to discuss the events surrounding the accident and asked if I could suggest an appropriate time for such a visit. During the month of August, any week would be acceptable. September is definitely out for me. I would suggest that you contact me at (717) 782-3950 and propose a date for your visit. Usually, Wednesdays and Thursdays are the best days in the week. Give my best regards to Tom Drolet and tell him I look forward to seeing him in September in Sun Valley, Idaho.

Sincerely,

John T. Collins
John T. Collins, Deputy Director
TMI-2 Support
Office of Nuclear Reactor Regulation
