Mr. John T. Collins
Effluent Treatment Systems Branch
U.S. Nuclear Regulatory Commission
Washington, D.C.

Dear John,

It was good to see you again at the IAEA meeting last week and I hope you didn't have the trouble getting out that you had going in.

You mentioned that the NRC have completed a preliminary evaluation of the TMI event and a copy of the report was available. Unfortunately I didn't get a copy of the report from you so could I ask you to send one on to me.

The paper on iodine removal which you presented is extremely interesting and I would like to make copies to circulate within Ontario Hydro. Could I get you to send me a better copy which I can have photocopied.

Sometime we (Ontario Hydro) would like to visit TMI to discuss with you and your staff the event, could you suggest an appropriate time for such a visit.

Finally would it be possible for my name to be added to the distribution list for the TMI weekly status report.

Best regards,

W.B. Stewart
Supervising Design Engineer
Nuclear Materials Management Department

P.S. Tom Drolet sends along his congratulations on your promotion to Assistant Director.
