

August 24, 1979

NOTE TO: Harold Denton, Director
Nuclear Reactor Regulation

Regarding the attached, I did try to call Mr. Bowers on August 21 but could not reach him. I was told that he was in California for two weeks.

The person who answered the phone would not identify herself, or the organization, but said that "although I wouldn't be able to answer their questions, they would like to see me squirm."
