June 9, 1994

Director
Office of Nuclear Materials Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, D.C. 20555

Attention:

Mr. Robert C. Pierson, 8D3

Chief, Licensing Branch

Division of Fuel Cycle Safety and Safeguards

Dear Mr. Pierson:

Reference:

- 1) SNM Material License SNM-1097, Docket # 70-1113
- 2) Letter, TP Winslow to Director, 4/29/93
- 3) Letter, CW Emeigh to TP Winslow, 5/24/93
- 4) Letter, TP Winslow to Director, 12/13/93

With reference to activities authorized by NRC License SNM-1097 at the General Electric Nuclear Energy Production (NEP) facility in Wilmington, NC, GE hereby notifies you of our intent to begin construction of a building to be located within the Controlled Access Area (CAA).

The proposed building is approximately 160' wide by 330' long with an eave height of approximately 25'. It will be located north and adjacent to the present FMO-X building within the CAA.

The design is a pre-engineered metal building with an insulated metal roof, insulated metal wall sheets and a concrete floor. Construction shall meet or exceed all State and local codes.

The current plans are to use the building for refurbishment and storage of shipping containers, however, future use may vary.

NF12. 0

Mr. Robert C. Pierson June 9, 1994 Page 2

Construction activities are scheduled to begin mid July, 1994.

Prior to introducing nuclear material into the new building, NEP shall submit a license amendment and obtain NRC approval for this activity.

Please contact me on (910) 675-5461 if you have any questions or would like to discuss the matter further.

Sincerely,

GE NUCLEAR ENERGY

T. P. Winslow, Manager
