

Docket No. 50-346

License No. NPF-3

Serial No. 875

December 3, 1982

RICHARD P. CROUSE  
Vice President  
Nuclear  
(419) 259-5221

Director of Nuclear Reactor Regulation  
Attention: Mr. John F. Stolz  
Operating Reactor Branch No. 4  
Division of Operating Reactors  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Mr. Stolz:

As a result of the meeting on September 2 to discuss the Radiological Effluent Technical Specifications as they relate to the Davis-Besse Nuclear Power Station Unit No. 1, a question arose as to the disposal of several thousand meteorological data strip charts which Toledo Edison has acquired over the past decade.

Approximately one-half of the strip charts are from the preoperational (construction) phase of the Davis-Besse Station. The other half of the data is from the operational phase. Data from the strip charts were manually reduced and are stored on magnetic tape.

Due to space considerations, we would prefer to destroy the strip charts. The data on magnetic tape will be retained and stored in a manner consistent with the applicable ANSI standards. Unless otherwise indicated, these meteorological data strip charts will be destroyed in December 1983.

If you have any questions, please address them to Jennifer Scott-Wasilk, AC 419/259-5000, Ext. 501.

Very truly yours,

A handwritten signature in cursive script, appearing to read 'R. Crouse'.
