Dear Dr. Colkitt:

SUBJECT: ROUTINE INSPECTION NO. 030-31765/94-001

On March 15 and 21, 1994, James P. Dwyer of this office conducted a routine safety inspection at the Harrisburg and Greater Pittsburgh Cancer Centers of activities authorized by the above listed NRC license. The inspection was an examination of your licensed activities as they relate to radiation safety and to compliance with the Commission's regulations and the license conditions. The inspection consisted of observations by the inspector, interviews with personnel, and a selective examination of representative records. The preliminary results of the inspections were discussed with Drs. Abdurrahman Unal and William Ying on March 15, 1994 and with Mr. Mitchell Jarosz on March 21, 1994. The inspection was held open pending review of one issue having to do with Omnitron International Corporation's resetting of your HDR exposure counters in May and December 1993. The inspection was closed on April 18, 1994 following a determination by the NRC that resetting the exposure counters was not a violation of any regulatory or license requirements. Final results of this inspection were communicated to Dr. Bernard Rogers on April 20 and May 18, 1994.

Within the scope of this inspection, no violations were identified.
