While in Mode 2, the Condensate Storage Tank T-120 water level fell below the
Technical Specification 3.7.1.3 limit. There was no consequence to public health
and safety since there was no significant decay heat in the core and since the
water level was restored within the allowable time. See also LER 82-107, 82-119,
0 6 82-121 and 82-123.
