OAK RIDGE, TENNESSEE 37830

October 19, 1982

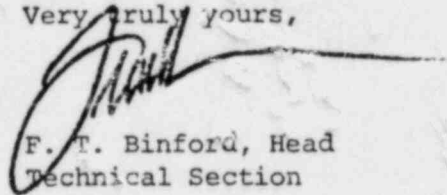

Mr. Richard Major
Senior Staff Engineer
U.S. Nuclear Regulatory Commission/ACRS
Washington, DC 20555

Dear Dick,

After reading the meeting summary for the September 29, 1982, Reactor Operations Subcommittee Meeting, I have the following comment.

During the discussion of the Turkey Point cold overpressure incident it was repeatedly brought out by the chairman and others, including me, that the technical specifications do not properly address situations in which the availability of certain systems (in this case the overpressure mitigation systems) are more vital to safe operation than is the case during most normal operating conditions. While this point is touched on in the summary, I feel that it is of over-riding importance and should receive more emphasis.

Very truly yours,

F. T. Binford, Head
Technical Section
