Mail Station P1-37  
Washington, D.C. 20555

Attention: Document Control Desk

Subject: Grand Gulf Nuclear Station  
Docket No. 50-416  
License No. NPF-29  
Letter of Intent Concerning Accident Source Terms

GNRO-94/00091

Gentlemen:

As you know, last year we initiated discussions with the staff concerning adoption of the advanced reactor source term work (NUREG-1465) into the Grand Gulf license basis. Since that time we have done some preliminary work in evaluating the level of effort necessary to incorporate the new source terms and have given some thought to how the license basis can be changed under the present regulations as well as potential applications.

We have recently learned that the NRC intends to initiate an effort to formulate an approach to applying the new source term work to operating reactors. We believe that Grand Gulf has the interest, experience and technical competence to contribute constructively to this effort and would like to offer our participation and support.

Please let me or Sheri Mahoney (601-437-6552) know when you intend to schedule an initial meeting. We welcome the opportunity to work with you and the industry on this issue.

Yours truly,

  
MJM/
