Mr. A. E. Lundvall, Jr. Vice President-Supply Baltimore Gas & Electric Company P. O. Box 1475 Baltimore, Maryland 21203

Dear Mr. Lundvall:

The NRC has provided a relief from a requirement of the ASME Boiler and Vessel Code, Section XI, which BG&E has determined to be impractical, in accordance with your application dated August 30, 1982.

The code relief, granted in accordance with CFR Part 50, Section 50.55a (g)(6)(i), relates to the hydrostatic test pressure requirement for two welds which cannot be isolated from the steam generator secondary side. These welds are part of a modification to the Unit 2 auxiliary feedwater system to be performed during the Fall 1982, Unit 2, refueling outage. An acceptable alternative test method has been approved.

Copies of our Safety Evaluation and Federal Register Notice are enclosed.

Sincerely,

Robert A. Clark, Chief Operating Reactors Branch #3 Division of Licensing
