

BEFORE THE UNITED STATES
NUCLEAR REGULATORY COMMISSION

In the Matter of)
NEW YORK POWER AUTHORITY) Docket No. 50-333
James A. FitzPatrick Nuclear Power Plant)

APPLICATION FOR AMENDMENT TO OPERATING LICENSE

The New York Power Authority requests an amendment to the Technical Specifications contained in Appendix A to Facility Operating License No. DPR-59 for the James A. FitzPatrick Nuclear Power Plant. This application is filed in accordance with Section 10 CFR 50.90 of the Nuclear Regulatory Commission's regulations.

This application for an amendment to the James A. FitzPatrick Technical Specifications proposes to alter the Plant Operating Review Committee's (PORC's) membership requirements and to delegate a portion of PORC's procedure review responsibilities for nuclear safety related procedures and procedure changes to the line organizations. PORC will continue to perform safety reviews associated with procedures that are of safety significance. The proposed procedure review and approval process will alter the scope of the PORC review function to be more appropriate for that of a safety oversight committee by reducing the administrative burden on the PORC.

In addition, a change is also being proposed to implement the guidance of Generic Letter 93-07. This Generic Letter discusses the removal of the review and audit responsibilities for the Emergency and Security Plans from the Technical Specifications.

Enclosed for filing is the signed original of a document entitled "Application for Amendment to Operating License." Attachments I, II, and III to this application contain the proposed changes to the Technical Specifications, the associated Safety Evaluation, and a markup of the current Technical Specification pages, respectively.
