Dear Mr. Bloch:

We, the Town Board of the Town of Two Creeks, representing the Town and its' People, wish to go on record of being in favor of the sleeving process to be made to the steam generator tubes in Unit 2 of the Point Beach Nuclear Power Plant.

We have been attending the various meetings being held regarding the sleeving and we realize that this process is necessary to maintain the efficiency and safety of the plant.

The Point Beach Nuclear Power Plant is an economical and efficient way of producing electricity for industrial and private use. This type of electricity must be maintained in order to have a prosperous state.

With kind regards, we are

Yours truly,

TOWN OF TWO CREEKS
