EVENT DESCRIPTION AND PROBABLE CONSEQUENCES (10)

0 2 | During the startup testing program, a Quality Assurance Reviewer determined
0 3 | that five safety related snubbers installed in the plant had not been
0 4 | determined operable by performing the necessary surveillance. This brought
0 5 | to light the potential for the omission of other snubbers from the listing
0 6 | of identified snubbers. This is reportable per Technical Specification
0 7 | 6.9.1.9.c. No adverse consequences resulted.

CAUSE DESCRIPTION AND CORRECTIVE ACTIONS (27)

1 0 | Discrepancies in the safety related snubber list are the result of some
1 1 | oversights in the turnover process between the AE and PF&L. PP&L has
1 2 | commenced verification of the list of safety related snubbers. Upon
1 3 | completion of the list, surveillances will be run on any snubbers not
1 4 | previously done.
