Updated Reportable Occurrence Report #82-08/03X-1, Docket #050-249 is being submitted to your office in accordance with Dresden Nuclear Power Station Technical Specification 6.6.B.2 (a), reactor protection system or engineered safety feature instrument settings which are found to be less conservative than those established by the technical specifications but which do not prevent the fulfillment of the functional requirements of affected systems.

This revised report indicates the probable reason for the occurrence, includes the temperatures at which the five temperature switches tripped, and provides a correction to the list of previous occurrences.

D. J. Scott
