Dear Mr. Kay:

SUBJECT: YANKEE CYCLE XVI

The Commission has issued the enclosed Amendment No. 77 to Facility Operating License No. DPR-3 for the Yankee Nuclear Power Station (Yankee) in response to your submittal of September 30, 1982 as revised by your letters dated October 15 and November 10, 1982.

The amendment incorporates provisions into the Technical Specifications required for operation with the refueled Core XVI and associated changes to certain containment isolation valves, portions of the electrical distribution system, and the electric motor operators for certain valves.

During our review of your proposed amendment we found that changes and additions were necessary to meet our requirements. We have discussed these changes with your staff and they have agreed with them.

Copies of our related Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

Original signed by
