

NOTICE OF VIOLATION

Combustion Engineering, Incorporated
Windsor, Connecticut 06095

Docket No. 70-1100
License No. SNM-1067

During an NRC inspection conducted on May 16-18, 1994, a violation of NRC requirements was identified. In accordance with the "General Statement of Policy and Procedure for NRC Enforcement Actions", 10 CFR Part 2, Appendix C, the violation is listed below.

License Condition S-6 of NRC License No. SNM-1067 states that "The instruments measuring the liquid-waste level in each dilution tank prior to discharge to the Farmington River shall be calibrated at least annually."

Contrary to the above, as of May 18, 1994, the instruments measuring the liquid-waste level in each dilution tank prior to discharge to the Farmington River had not been calibrated for several years.

This is a Severity Level IV violation (Supplement VI).

Pursuant to the provisions of 10 CFR 2.201, Combustion Engineering, Inc., is hereby required to submit a written statement or explanation to the U.S. Nuclear Regulatory Commission, ATTN: Document Control Desk, Washington, D.C. 20555 with a copy to the Regional Administrator, Region I, within 30 days of the date of the letter transmitting this Notice of Violation (Notice). This reply should be clearly marked as a "Reply to a Notice of Violation" and should include for each violation: (1) the reason for the violation, or, if contested, the basis for disputing the violation, (2) the corrective steps that have been taken and the results achieved, (3) the corrective steps that will be taken to avoid further violations, and (4) the date when full compliance will be achieved. If an adequate reply is not received within the time specified in this Notice, an order or a Demand for Information may be issued to show cause why the license should not be modified, suspended, or revoked, or why such other action as may be proper should not be taken. Where good cause is shown, consideration will be given to extending the response time.
