License No. 21-16814-01
Docket No. 030-11690

Gentlemen:

Thank you for your letter dated December 20, 1990, informing us of the steps you have taken to correct the regulatory concerns identified in our letter dated November 27, 1990. We have no further questions regarding your response to Items 2 and 3. Regarding Item 1, your response indicated that Condition 11 now reads that the licensed materials shall be used by certain named individuals. Please note that the addition of authorized users must be requested by filing an amendment request to the NRC Region III office and that no activity is in accord with NRC regulatory requirements unless it is specifically authorized by the NRC.

As a result of the telephone conversation with Mr. Mike Kurth and yourself on December 28, 1990, we understand that you will be submitting, in the form of an amendment request, the appropriate information to add those individuals to your NRC license. This information should include those individuals' experience in radiation safety and any other pertinent information with regards to training in the field of radiation. This amendment request, along with the appropriate fee should be sent to the U. S. Nuclear Regulatory Commission, Region III, Materials Licensing Section, 799 Roosevelt Road, Glen Ellyn, Illinois 60137.

If you have any questions regarding this matter, please feel free to call Mr. Mike Kurth at (708) 790-5159.

We will examine your corrective action during a future inspection. Your cooperation with us is appreciated.

Sincerely,

9101110145 910107
