Dear Mr. Smith:

SUBJECT: NRC Combined Inspection Nos. 50-277/94-09; 50-278/94-09

An announced inspection of your Radiation Protection Program at the Peach Bottom Atomic Power Station was conducted by Mr. L. Eckert on May 23-27, 1994. The inspection findings were discussed with Mr. G. Gellrich and other members of your staff on May 27, 1994.

Areas reviewed during the inspection are important to health and safety and are discussed in the enclosed inspection report. The inspection focused on your implementation of the revised 10 CFR 20 regulations.

Programmatic changes made to your Radiological Controls Program at the Peach Bottom Atomic Power Station as a result of the revised 10 CFR 20 regulations were conservative and, in general, established with good bases. No safety concerns or violations of NRC regulatory requirements were identified.

No response to this letter is required. Your cooperation with us is appreciated.

Sincerely,

Original Signed By:  
Richard R. Keimig
