

June 20, 1994

Docket Nos. 50-213, 50-245  
50-336, 50-423

LICENSEE: Northeast Nuclear Energy Company

FACILITY: Millstone Nuclear Power Station, Units 1, 2, 3 and Haddam Neck

SUBJECT: SUMMARY OF JUNE 15, 1994, MEETING REGARDING MATTERS RELATED  
TO HIGH LEVEL WASTE STORAGE

On Wednesday, June 15, 1994, a meeting was held at NRC headquarters in Rockville, Maryland with Northeast Nuclear Energy Company (NNECO) and the NRC staff to discuss matters related to high level waste storage. Enclosure 1 is the list of individuals participating in the discussions.

The following is a summary of the significant items discussed.

NNECO discussed the current spent fuel storage capacity and future spent fuel storage plans for Millstone Units 1, 2, 3 and the Haddam Neck Plant. Future plans include: 1) a partial rerack for Haddam Neck in the 1995-96 timeframe, 2) possible removal of Millstone Unit 2 region B cell blockers in 1995, 3) the addition of racks for Millstone Unit 1 in 1997, and 4) a rerack for Millstone Unit 3 in 1998. In parallel with these possible changes, NNECO will be following the Department of Energy (DOE) actions regarding long-term storage of high level waste.

NNECO discussed current industry actions regarding temporary monitored retrieval storage until the DOE permanent site becomes available. The Nuclear Waste Policy Act stated that the DOE site would begin operations not later than January 31, 1998, however, this date is currently in question.

NNECO discussed possible scenarios that might occur if the DOE facility is not ready to accept spent fuel in 1998 and possible state responses.
