

June 22, 1994

Mr. John J. Barton
Vice President and Director
GPU Nuclear Corporation
Oyster Creek Nuclear Generating Station
Post Officer Box 388
Forked River, New Jersey 08731

Dear Mr. Barton:

SUBJECT: REACTOR BUILDING ACCESS CONTROL MODIFICATION (TAC NO. M84616)

During the June 1, 1994 meeting between GPUN and NRC representatives, corrective actions for the 1993 Operational Safeguards Response Evaluation (OSRE) findings at the Oyster Creek Nuclear Generating Station were discussed. As discussed in my letter of January 25, 1994, the specific findings and corrective actions focused on a long-standing open issue regarding the protection program for certain safety related equipment in the reactor building.

At the meeting, GPUN representatives invited NRC to observe some contingency drills at Oyster Creek scheduled for June 29, 1994, as a means of demonstrating that Oyster Creek's modified protective strategy can protect this equipment with high assurance. Subsequent liaison has confirmed the June 29 date, and established a tentative schedule of events that could enable NRC to evaluate the modified protection strategy and provide the basis for closing the reactor building issue. The tentative schedule of events is enclosed. The NRC personnel performing the evaluation will be the NRC OSRE team, including Region I representation.

Sincerely,
