SUMMARY

Scope: The areas examined during this routine material control and accounting (MC&A) safeguards inspection included MC&A System Management and Assessment, Internal Controls, Measurement Systems, Measurement Control, Physical Inventory and MC&A for Imports and Exports. Licensee actions with regard to a violation and four inspector follow-up items identified during previous inspections were also examined.

Results: Within the scope of the inspection, one violation was identified. Three new inspector follow-up items were opened, and four previously identified follow-up items were closed. One violation from the previous inspection remains open pending an additional response from the licensee.
