SUBJECT: NRC INSPECTION REPORT 030-03728/94-01

This refers to the routine, unannounced inspection conducted by Mr. Gilbert L. Guerra, Jr., of this office on June 8-9, 1994. The inspection included a review of activities authorized by Byproduct Materials License 05-01399-08. At the conclusion of the inspection, the findings were discussed with members of your staff.

The inspection was an examination of activities conducted under the license as they relate to radiation safety and to compliance with the Commission's rules and regulations and the conditions of the license. The inspection consisted of selective examinations of procedures and representative records, interviews of personnel, independent measurements, and observation of activities in progress.

No violations or deviations were identified; therefore, no response to this letter is required.

The inspector noted that your license is currently in renewal status with the NRC and that you are in compliance with the conditions of the current license. However, as discussed with your staff, the renewed license will contain more specific requirements, such as frequencies for conducting audits, surveys, and instrument calibrations. Also, the inspector noted that steps were being taken to implement a better records management and tracking system in order to comply with such new license conditions.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be placed in the NRC Public Document Room.
