GEORGE C. CREEL  
VICE PRESIDENT  
NUCLEAR ENERGY  
(301) 260-4455

January 10, 1991

U. S. Nuclear Regulatory Commission  
Washington, DC 20555

ATTENTION: Document Control Desk

SUBJECT: Calvert Cliffs Nuclear Power Plant  
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318  
License Amendments Removing the Station Batteries' Dummy Load Profiles  
from the Technical Specifications (TAC NOS. 61710, 61711, 69242 and  
69243)

REFERENCE: (a) Letter from Mr. S. A. McNeil (NRC) to Mr. G.C. Creel (BG&E),  
dated May 18, 1989, Issuance of Amendments

Gentlemen:

On May 18, 1989 the Commission issued Amendment No. 137 to Facility Operating License No. DPR-53 and Amendment No 120 to Facility Operating License No. DPR-69 for the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, respectively.

These amendments modify Technical Specification 3/4.8.2.3, "Electrical Power System: D.C. Distribution-Operating," by deleting the dummy load profile for the 18-month station battery service test from Technical Specification Surveillance Requirement 4.8.2.3.2.d.2 and instead specify that the load profile is documented in Chapter 8 of the Calvert Cliffs Nuclear Power Plant Units 1 and 2 Updated Final Safety Analysis Report (UFSAR) and updated in accordance with 10 CFR 50.71(e).

In accordance with Reference (a), these amendments were not to become effective until 14 days after our issuance of a notarized letter to the Commission providing official certification of the completion, approval and implementation, in accordance with the provisions of 10 CFR 50.59, of a new design load study reflecting current plant conditions at Calvert Cliffs.

We certify with this letter that a new design load study reflecting current plant conditions at Calvert Cliffs has been completed, approved, and implemented, in accordance with the provisions of 10 CFR 50.59.

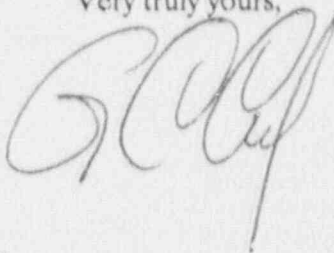

Therefore, we intend to implement Amendments 137 and 120 fourteen days from the date of this letter, or shortly thereafter.
