Response to Generic Letter 82-25

Reference (1) forwarded a request from Brookhaven National Laboratory (BNL) for assistance in field testing new measurement equipment and inventory techniques that have been developed to aid in strengthening International Atomic Energy Agency (IAEA) safeguards.

To facilitate our decision making process concerning involvement in the BNL field test program, it is requested that the additional information available concerning the program, mentioned in Reference (1), be sent to us as expeditiously as possible. Per conversations with Jane Gibson of your staff, it is our understanding that this request for additional information is not indicative of our intent to participate in the program and that our final decision will be forwarded directly to BNL subsequent to our receipt and review of the requested field testing program information.
