Inspection Summary

Areas Inspected: Included review of events and circumstances relating to the discovery of an insecure vital area door with the intrusion alarm in the access mode, reported by the licensee in accordance with 10 CFR 73.71(c).

The inspection involved eight inspector hours on site by one NRC inspector. Two inspection hours were accomplished during offshift periods.

Results: The licensee was found to be in noncompliance with NRC requirements within the one area examined during the inspection, as noted below.
