PRAIRIE ISLAND NUCLEAR GENERATING PLANT
Docket Nos. 50-282 License Nos. DPR-42
50-306 DPR-60

Revised Pages for License Amendment Request Dated September 21, 1992
Instrumentation Specification Changes

Attached are revised pages for the September 21, 1992 License Amendment Request which proposed changes to surveillance test intervals and allowed outage times for the engineered safety features and reactor protection system instrumentation. The attached revisions incorporate changes to the Bases for Section 3.5 which were incorporated into the Prairie Island Technical Specifications since the subject license amendment request was originally submitted. Also attached is a revision to the Technical Specifications List of Tables which incorporates the table changes proposed by the subject license amendment request. The attached revisions do not change the conclusions of the original significant hazards evaluation.

Please contact Gene Eckholt (612-388-1121 Ext 4663) if you have any questions related to this revision of the September 21, 1992 License Amendment Request.
