Re: Turkey Point Units 3 and 4
Docket Nos. 50-250 and 50-251
Operational Safeguards Response Evaluation
(OSRE) - TAC NOS. M88440 AND M88441

U. S. Nuclear Regulatory Commission (USNRC) letter dated April 18, 1994, documented the results and conclusions of the Operational Safeguards Response Evaluation (OSRE) conducted at Turkey Point Units 3 and 4, from January 10 to January 13, 1994. The attachment to this letter provides Florida Power & Light Company's response to the concerns identified in the USNRC's April 18, 1994 letter.

Should there be any questions, please contact us.

Very truly yours,

T. F. Plunkett
Vice President

TURKEY POINT UNITS 3 AND 4
OPERATIONAL SAFEGUARDS RESPONSE EVALUATION

Concern # 1: Current Response Strategy

A response station, manned with armed responders ready to interdict themselves between adversaries and target sets, will be added. The location of this station will reduce the timeline to interdiction.

Concern # 2: Contingency Response Training

The annual security officer re-qualification has been amended to place more emphasis on those tasks which are not performed on a routine basis, particularly tactical response. The security gun range has recently undergone major modifications. The range now has a moving target system, Dualatron pop up/swing out target system, and simulated walls. This new arrangement will allow the trainers to configure the firing line to simulate several plant areas. In-plant drills will continue during low activity time frames in order to involve the entire security force.

Concern # 3: Deadly Force

The proper application of deadly force is addressed in annual training referencing applicable state statutes and NRC Information Notice 89-05. Field training will be enhanced by the use of the moving and Dualatron pop up/swing out target systems to challenge the officer to make on-the-spot decisions on the proper application of deadly force. The enhanced training will also put the officer in a stressful situation where an adversary is challenged and stopped. The officer must maintain target acquisition until the target moves or surrenders.

With proper training and drills, using various armed/unarmed adversaries, proper application of deadly force will be reinforced. There are no plans for training security officers in the use of non-lethal means for subduing unauthorized individuals.

Concern # 4: Weapons Training

FPL's Security Force Weapons Training includes the following:

- 1) The Annual Training Program has been modified to incorporate more site-specific tactical training.
- 2) Incorporation of table top exercises in annual training.
- 3) Increased emphasis on management expectations with respect to participation by security officers on "open range" days at the security gun range.
- 4) Continued participation in the annual Homestead Police SWAT School, as available.
