Virginia Electric and Power Company
ATTN: Mr. R. H. Leasburg, Vice President
Nuclear Operations
P. O. Box 26666
Richmond, VA 23261

Gentlemen:

Subject: Report No. 50-338/50-339/82-36

This refers to the routine safety inspection conducted by C. D. Evans of this office on October 18-22, 1982, of activities authorized by NRC License No. NPF-4 and NPF-7 for the North Anna facility and to the discussion of our findings held with W. R. Cartwright at the conclusion of the inspection.

Areas examined during the inspection and our findings are discussed in the enclosed inspection report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The Region II Mobile Laboratory was also brought to your site and used by the inspector to make certain independent measurements. The basic purpose of these independent measurements is to verify your capability for analyzing effluents, and to achieve and maintain comparable methods of analyses between your facility and the NRC. The complete data from these measurements will be reported in a subsequent Inspection Report.

Within the scope of this inspection, no violations or deviations were disclosed.

One unresolved item resulted from this inspection and is discussed in the enclosed inspection report. This item will be examined during subsequent inspections.

In accordance with 10 CFR 2.790(a), a copy of this letter and the enclosure(s) will be placed in the NRC's Public Document Room unless you notify this office, by telephone, within ten days of the date of this letter and submit written application to withhold information contained therein within thirty days of the date of this letter. Such application must be consistent with the requirements of 10 CFR 2.790(b)(1).

Should you have any questions concerning this letter, we will be glad to discuss them with you.

Sincerely,

H. C. Dance, Branch Chief
Project Branch 2
