Docket No. 50-387
License No. NPF-14

Dear Mr. Haynes:

Attached please find a copy of Licensee Event Report No. 82-031/03L-1. This event was determined to be reportable per Technical Specification 6.9.1.9.b. Revision 0 noted that differential pressure instrumentation indicated that Zone III of secondary containment was not maintained at the required vacuum. Additional events of a similar nature occurred prior to implementation of the design changes to produce a permanent solution. This revision lists the other events and explains the design changes.

H.W. Keiser
Superintendent of Plant-Susquehanna
