Rids

FEB 22 1991

Docket No. 50-341

The Detroit Edison Company  
ATTN: William S. Orser  
Senior Vice President  
Nuclear Operations  
6400 North Dixie Highway  
Newport, MI 48166

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. W. G. Rogers, S. Stasek, B. Drowin, D. Butler and D. Schrum of this office on December 17, 1990, through February 8, 1991, of activities at Fermi 2 authorized by Facility Operating License No. NPF-43 and to the discussion of our findings with you and others of your staff at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel.

During the inspection, one item identified in your Operator Qualification Program appeared to be in violation of NRC requirements. The inspection showed that actions are being taken to correct the identified violation and to prevent recurrence. Consequently, we have exercised our discretion as allowed under the NRC Enforcement Policy. Because we want to encourage prompt self-identification and correction of problems, the violation is not being cited because the criteria specified in 10 CFR Part 2, Appendix C, Section V.G of the Enforcement Policy were satisfied.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosed inspection report will be placed in the NRC Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

Brent Clayton, Chief  
Reactor Projects Branch 2

Enclosure: Inspection Report
