

DEC 3 1982

Docket No. 50-341

The Detroit Edison Company  
ATTN: Mr. Donald A. Wells  
Manager, Quality Assurance  
2000 Second Avenue  
Detroit, MI 48226

Gentlemen:

This refers to the routine safety inspection conducted by Messrs. K. R. Naidu and B. H. Little of this office on September 8-10, 1982, of activities at Enrico Fermi Nuclear Power Plant, Unit 2, authorized by NRC Construction Permit No. CPPR-87 and to the discussion of our findings with Messrs. W. J. Fahner, S. H. Noetzel and G. Trahey at the conclusion of the inspection.

The enclosed copy of our inspection report identifies areas examined during the inspection. Within these areas, the inspection consisted of a selective examination of procedures and representative records, observations, and interviews with personnel. This letter also acknowledges your letter dated September 14, 1982, confirming the stop work order issued to L. K. Comstock the electrical contractor and describing your plan of corrective actions.

During this inspection, certain of your activities appeared to be in non-compliance with NRC requirements, as specified in the enclosed Appendix. A written response required.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter, the enclosures, and your response to this letter will be placed in the NRC's Public Document Room. If this report contains any information that you (or your contractors) believe to be exempt from disclosure under 10 CFR 9.5(a)(4), it is necessary that you (a) notify this office by telephone within ten (10) days from the date of this letter of your intention to file a request for withholding; and (b) submit within twenty-five (25) days from the date of this letter a written application to this office to withhold such information. If your receipt of this letter has been delayed such that less than seven (7) days are available for your review, please notify this office promptly so that a new due date may be established. Consistent with Section 2.790(b)(1), any such application must be accompanied by an affidavit executed by the owner of the information which identifies the document or part sought to be withheld, and which contains a full statement of the reasons which are the bases for the

DEC 3 1982

claim that the information should be withheld from public disclosure. This section further requires the statement to address with specificity the considerations listed in 10 CFR 2.790(b)(4). The information sought to be withheld shall be incorporated as far as possible into a separate part of the affidavit. If we do not hear from you in this regard within the specified periods noted above, a copy of this letter, the enclosures, and your response to this letter will be placed in the Public Document Room.

We will gladly discuss any questions you have concerning this inspection.

Sincerely,

W. S. Little, Chief  
Engineering Programs Branch
