Docket No. 070-00273 (terminated)
License No. SMB-366 (terminated)
License No. R-109 (terminated)

Dear Mr. Wentzel:

SUBJECT: CLOSE-OUT INSPECTION OF FORMER NUCLEAR REGULATORY COMMISSION (NRC)
AND ATOMIC ENERGY COMMISSION (AEC) LICENSED SITE,
(NRC REPORT NO. 999-90003/94045(DRSS))

This refers to the special close-out inspection conducted by D. G. Wiedeman of this office on June 23, 1994, of your facilities located at 200 Town Street, Building 63, Fostoria, Ohio. Licensed activities were previously authorized by Atomic Energy Commission (AEC) and Nuclear Regulatory Commission (NRC) Special Nuclear Material License No. SNM-252, and Source Material Licenses No. SMB-366 and R-109. This also refers to the telephone conversation between Mr. Wiedeman and James Moon of Union Carbide Corporation on June 29, 1994, regarding the results of our confirmatory wipe tests for removable contamination collected during the inspection. The results of our preliminary survey findings were discussed with you at the conclusion of the inspection on June 23, 1994.

The enclosed copy of our inspection report identifies areas examined during the inspection. The inspection consisted of a selective examination of representative records from the former license file, observations, independent measurements, and interviews with the current occupants of the building.

Based upon the results of this inspection, it was concluded that all the facilities (grounds and buildings) meet the current NRC release criteria for release for facilities of unrestricted use. Consequently, we have no further questions regarding this matter.

In accordance with 10 CFR 2.790 of the Commission's regulations, a copy of this letter and the enclosure to this letter will be placed in the NRC Public Document Room.
