Gentlemen:

This refers to the Systematic Assessment of Licensee Performance (SALP) Board Report of the Waterford Facility, Unit 3, Construction Permit CPPR-103. The SALP Board met on August 24, 1982, to evaluate the performance of the subject facility for the period July 1, 1981, through June 30, 1982. The performance analyses and resulting evaluation are documented in the enclosed SALP Board Report. These analyses and evaluation were discussed with you at your office in New Orleans, Louisiana, on October 20, 1982.

The performance of your facility was evaluated in the following functional areas: Containment and Other Safety-Related Structures; Piping Systems and Supports; Safety-Related Components; Fire Protection; Electrical Power Supply and Distribution; Instrumentation and Control Systems; Licensing Activities; Plant Operations Preparation; Security and Safeguards; Preoperational Testing; Surveillance; Audits, Reviews and Committee Activities; Initial Fuel Load Preparations; Chemistry/Radiochemistry; Radiation Protection; Effluent Control and Monitoring; Transportation of Radioactive Waste; and Radioactive Waste Management.

The SALP Board evaluation process consists of categorizing performance in each functional area. The categories which we have used to evaluate the performance of your facility are defined in Section II of the enclosed SALP Board Report.

During the meeting with J. W. Wyatt, you, and other members of your staff in New Orleans, Louisiana, on October 20, 1982, you were given the option of submitting comments concerning our evaluation of your facility by November 9, 1982.
