Docket No. 70-1151
License No. SNM-1107

Westinghouse Electric Corporation
ATTN: Mr. J. A. Fici, Manager
Columbia Plant
Commercial Nuclear Fuel Division
Drawer R

Gentlemen:

SUBJECT: NOTICE OF VIOLATION
(NRC INSPECTION REPORT NO. 70-1151/94-04)

This refers to the inspection conducted by G. W. Salyers of this office on May 31 - June 3, 1994. The inspection included a review of activities authorized for your Commercial Nuclear Fuel Division. At the conclusion of the inspection, the findings were discussed with those members of your staff identified in the report.

Areas examined during the inspection are identified in the report. Within these areas, the inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observation of activities in progress.

Based on the results of this inspection, certain of your activities appeared to be in violation of NRC requirements, as specified in the enclosed Notice of Violation (Notice). The NRC is concerned about Violation A because emergency response teams must have immediate access to reliable equipment. Also, the issues concerning the adequacy of equipment maintenance had been identified by licensee personnel about eight months prior to this inspection but were not sufficiently resolved to avoid this violation of your Emergency Plan requirements.

You are required to respond to this letter and should follow the instructions specified in the enclosed Notice when preparing your response. In your response, you should document the specific actions taken and any additional actions you plan to prevent recurrence. After reviewing your response to this Notice, including your proposed corrective actions and the results of future inspections, the NRC will determine whether further NRC enforcement action is necessary to ensure compliance with NRC regulatory requirements.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosures will be placed in the NRC Public Document Room.
