Department of Applied Science
Brookhaven National Laboratory
Upton, NY 11973

ATTENTION: Ms. Joyce L. Tichler

SUBJECT: Wind Characteristics Data for 1989 and 1990

REFERENCE: (a) Letter from Ms. J. L. Tichler (BNL) to Mr. R. E. Denton (BG&E), dated February 12, 1991, same subject

Gentlemen:

This is in response to Reference (a) which requested information on stack characteristics and the climatology of our plant. The specific data which you requested is enclosed. Unfortunately, we are not able to send it to you in the electronic format you specified. Nonetheless, we hope that this data will meet your needs.

While data for both 1989 and 1990 is included, it should be noted that both years were atypical in that the plants were down the majority of the time. This may affect data consistency with respect to other years. Plant parameters (i. e. stack height, exit velocity, etc.) however, should be the same.

Should you have any further questions regarding this matter, we will be pleased to discuss them with you.

Very truly yours,

RED/EPW/epw/bjd
