U.S. Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

Gentlemen:

Subject: Oyster Creek Nuclear Generating Station
Docket No. 50-219
Technical Specification Change Request No. 218
Standard Technical Specification Revisions

By letter dated May 12, 1994, GPU Nuclear Corporation, licensee of the Oyster Creek Nuclear Generating Station, submitted the subject amendment to the Nuclear Regulatory Commission. The proposed changes reflect Standard Technical Specification revisions contained in General Electric Company Licensing Topical Reports which, based upon reliability analyses, support increases in surveillance test intervals and allowed out-of-service times for surveillance and repair. The proposed change involves the Reactor Protection System, Emergency Core Cooling System Actuation, Isolation Actuation and Control Rod Block Instrumentation.

The New Jersey Department of Environmental Protection's Bureau of Nuclear Engineering reviewed the above amendment in accordance with the requirements of 10CFR50.91(b), and has no comments.

If you have any questions, please contact Suren Singh at (609) 987-2039 or Rich Pinney at (609) 987-2086.

Sincerely,

Kent Tosch, Manager
Bureau of Nuclear Engineering
