Dr. Joseph D. Lafleur  
Office of International Programs  
Nuclear Regulatory Commission  
Washington, D.C. 20555

Dear Dr. Lafleur:

U-9121

As a follow up of our letter dated April 10, I can now advise you that the governmental committee will consist of the following people:

Erik Jansson, Swedish Nuclear Power Inspectorate, SKI  
Tomas Backström, - " -  
Peter Lundqvist, - " -  
John C. Lindhe, Nat. Inst. of Radiation Protection, SSI  
Lars Malmqvist, - " -

Messrs. Jansson, Backström and Lindhe will arrive to Washington and take part in the discussions on April 18 and messrs. Lundqvist and Malmqvist will arrive one day later.

The people from the SSI are especially interested in the emergency response organization, radiation, measurements, releases and doses. They have collected the question list that is attached to this letter. I have contacted the Pennsylvania state emergency people and expect them to give the answers to most of these questions, but I would also appreciate to have NRC to review them and give comments where appropriate.

Thank you very much.

Sincerely yours,

Lars G Larsson  
Attaché,  
Science and Technology

P.S. I have also heard that the Danes will send people and coordinate with the Swedish investigation. This is however not confirmed, and I have asked Mr. Jorgen Rasmussen of the Danish Embassy to advise if a Danish group will accompany the Swedish one D.S.

*- it is confirmed now!*
