b. Letter, VYNPC to USNRC, BVY 94-49, dated May 4, 1994

Subject: Reformatted Vermont Yankee Technical Specifications

Enclosed please find one copy of a reformatted version of the Vermont Yankee Technical Specifications. As discussed in Reference (b), the Vermont Yankee Technical Specifications have been reformatted to facilitate use of the document in electronic form, in addition to the present method of hard copy distribution. We are requesting NRC concurrence to use this reformatted version in place of the presently existing version.

By Reference (b), Vermont Yankee first submitted a copy of the reformatted Technical Specifications for NRC review and concurrence. The version enclosed with this letter has been revised to address all comments generated as a result of NRC review of the Reference (b) document.

There are three (3) enclosures to this letter. Enclosure A is a copy of the reformatted Technical Specifications which has been "frozen" through Amendment Number 137 (the amendment which was current at the time Reference (b) was prepared for submittal), and which has been revised to address all comments generated in NRC review of the Reference (b) submittal. Since preparation of Reference (b), two (2) additional license amendments have been received, Amendments 138 and 139. Therefore, Enclosure B to this letter contains the replacement pages for Amendment 138, and Enclosure C to this letter contains the replacement pages for Amendment 139. The instructions to incorporate these amendments into the Enclosure A master document are contained on the respective enclosure cover sheets.

Vermont Yankee believes that this improvement to our Technical Specifications will make the document more accessible to our staff, while reducing the number of hard copies that need to be continually maintained and updated. We trust that the enclosed reformatted version of our Technical Specifications is found acceptable. Please contact this office with any remaining questions that you may have.

Sincerely,

VERMONT YANKEE NUCLEAR POWER CORPORATION
