Attention: Mr. D. M. Sternberg
Chief, Reactor Projects Branch No. 1

Subject: NRC INSPECTION AT WNP-3/5
IE REPORT NO. 50-508/82-06, 50-509/82-03
NONCOMPLIANCE (50-508/82-03/01)

Reference: G03-82-551, Letter, Supply System Response to the Subject Noncompliance, dated May 28, 1982.

The referenced letter detailed corrective/preventive actions taken and the date of full compliance for the subject noncompliance (absence of specific preventive maintenance control for Shut Down Cooling Heat Exchangers). In an attempt to verify that the corrective actions had been accomplished, the Supply System discovered that not all actions had been completed as reported. Specifically, the July 30, 1982 date of full compliance was not met and intensive training was conducted only for Ebasco personnel involved with Receipt and Control.

The Supply System is currently evaluating the status of the corrective/preventive actions and will determine the significance these commitments were not fulfilled. The Supply System will respond by March 15, 1983 with the results of the evaluation including a new date of full compliance and any additional actions required to satisfactorily resolve the noncompliance.

Should you have any questions or desire further information, please contact me directly.

for R. S. Leddick (760)
Program Director, WNP-3
