URFO:REH
Docket No. 40-8681

Umetco Minerals Corporation
ATTN: W. W. Brice, Maintenance
Superintendent
White Mesa Uranium Mill
P. O. Box 669
Blanding, Utah 84511

Dear Mr. Brice:

In early December 1991, a seminar was sponsored by the Nuclear Regulatory Commission primarily for the Department of Energy and their contractors to discuss ground water standards, remediation, and Alternate Concentration Limit applications. At that time, you were invited to participate in the meeting, and in some cases you did. As you may recall, we committed to sending you the minutes/summary of the meeting when they were completed.

Enclosed is a copy of the minute/summary of the referenced meeting. This information is provided to you to update and supplement the information you received during the October 1988 seminar held in Denver, sponsored by the Nuclear Regulatory Commission, which addressed ACL methodology for Title II.

After reviewing this package, if you have questions, please feel free to contact Gary Konwinski, Joel Grimm or Cynthia Miller-Corbett of my staff.

Sincerely,
Original Signed By:
R. E. HALL

Ramon E. Hall
Director
