MEMORANDUM FOR: G. W. Knighton, Chief
Research and Standards Coordination Branch, NRR

FROM: R. M. Kenneally
Mechanical/Structural Engineering Branch, RES

SUBJECT: DRAFT FINAL PROGRESS REPORT FOR THE SAN ONOFRE NUCLEAR
GENERATING STATION UNIT 1 (SONGS-1) AUXILIARY
FEEDWATER SYSTEM (AFWS) PROJECT

Enclosed are ten copies of the subject report for NRR review. The report describes the accomplishments of the SONGS-1 AFWS Project of the Seismic Safety Margins Research Program (SSMRP). The project started on May 1, 1981, and was terminated at the request of NRR on January 29, 1982. Since the project was not completed, the report is limited to documenting the accomplishments of the project at the time the analysis was terminated.

The draft is only for review and all results should be considered preliminary. The final report will be published after NRC and Southern California Edison Company (SCEC) comments have been reviewed and incorporated.

I request that you provide me with your comments by July 14, 1982, so that the final report can be prepared and the contract closed.
